

Instructions for using the repository in browser

1. Start editing:

2. Propose changes:

A screenshot of a "Commit changes" dialog box. It contains a text input field with "Added new papers under section X", an optional description field, and two radio button options: "Commit directly to the main branch" (unselected) and "Create a new branch for this commit and start a pull request" (selected). Below the options is a text input field containing "changes_branch". At the bottom, there are two buttons: "Propose changes" (highlighted with a red box) and "Cancel".

3. Open pull request - check that the 2 branches on top are correct and press create pull request

Open a pull request

The change you just made was written to a new branch named `changes_branch`. Create a pull request below to propose these changes.

A screenshot of the "Open a pull request" form. At the top, it shows "base: main" and "compare: changes_branch" in dropdown menus, with a green checkmark and the text "Able to merge. These branches can be automatically merged." Below this is a text area with the title "Added new papers under section X" and a "Write" tab selected. There is a "Preview" tab and a rich text editor toolbar. A large text area for "Leave a comment" is present, followed by a file upload section. At the bottom right, a green "Create pull request" button is highlighted with a red box.

4.
